Learning From the Experts

Metanoia started with the knowledge that the experts in our community are the folks that live and raise families here. As we push forward together, we recognize that our most valuable assets are each other.

Metanoia's Board of Directors continues to include community members as a part of the leadership team. We are happy to report that **Mrs. Ida Taylor** rejoined our board this year. As someone that was working hard in this community long before Metanoia arrived fifteen years ago, her voice is an important contribution that helps us to remain focused on what our neighbors want and need. **Miss Kelly Lucas** is a parent of four students in the Metanoia Youth Leadership Academy and **Miss Desiree Dudley-Leach** also has four children in the Academy. Both Kelly and Desiree help us focus on the needs of the young families and single mothers that make up such a big part of our community. Desiree also serves as the President of the Accabee Community Association. **Miss Rashawna Hawkins** is a graduate of Metanoia's Youth Leadership Academy, works at Urban Electric Company, and recently became a mother herself. Rashawna's participation underscores the benefit of building leaders through the Youth Leadership Academy that reinvest back in the community as leaders.

From Bill & Ayesha

Do you remember where you were in 2002? That was the year that the **South Carolina Cooperative Baptist Fellowship** hired two 'urban ministers' to get something off the ground in the zip code of South Carolina with the highest concentration of child poverty. The initial job description asked only that the couple spend a year listening to the community and considering national best practices before anything was begun.

This year, Metanoia has been in existence fifteen years! We are often asked if we could have foreseen all that our work has become way back in 2002. The answer – “NO WAY!” Indeed, about the only thing that has been consistent about Metanoia is that we are **always evolving**. From a small after school program for a handful of elementary school students, Metanoia has grown to become a holistic community development organization with a focus on leadership development, housing development and economic development.

Though we have grown and continue to grow in new ways, we remain faithful to the core beliefs that have made our work distinctive.

- We believe **citizens are the real experts on their neighborhood and deserve to be listened to** as solutions are developed.
- We believe that our community is a glass half full rather than a glass half empty and **we seek to discover and grow the assets of our community wherever we find them.**
- We believe that faith is **believing in spite of the circumstances** we see before us **and watching the circumstances change!**

That last definition of faith is what carries us forward. There are people of different religious practices now involved in our movement, but we all try to see past the immediate circumstances of our distressed community and we

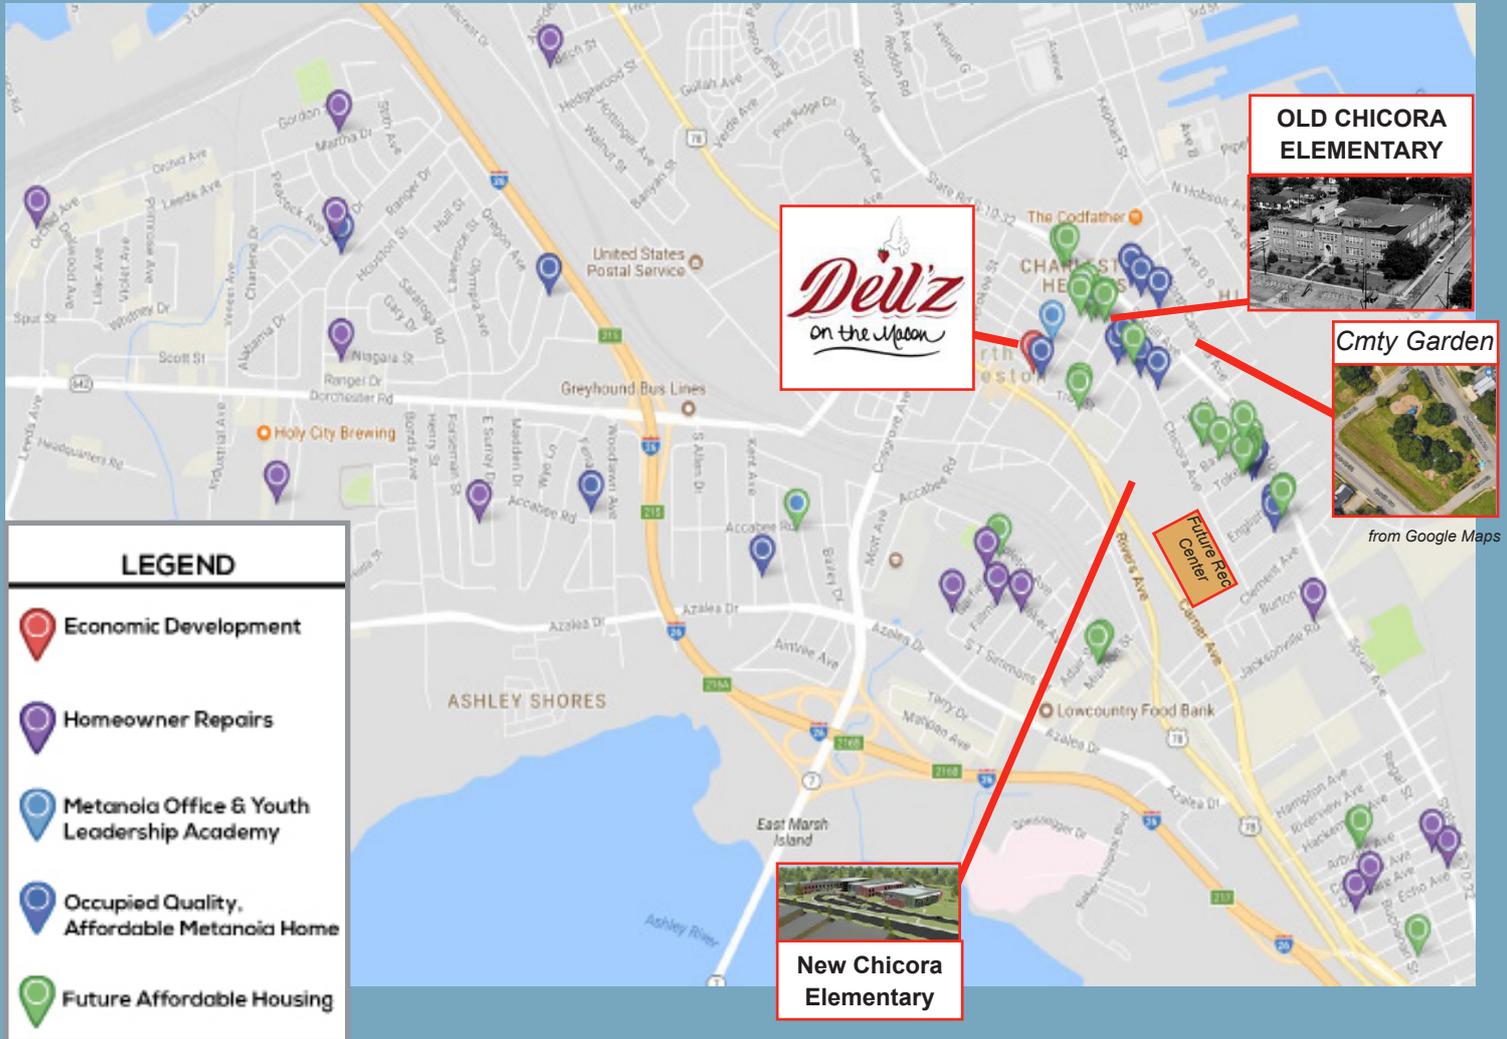

seek to work for a better tomorrow. A lot of positive progress has been made but we still have so far to travel. Just as we had no idea what form Metanoia would take fifteen years ago, we don't fully know what our movement will accomplish in the years ahead. However, **we pledge to continue building authentic relationships, believing in spite of the circumstances, AND WATCHING THE CIRCUMSTANCES CHANGE.**

On behalf of everyone on our team here at Metanoia (Board and staff alike), we want to thank you for taking time to review all that is now occurring around our movement. We also want to offer the sincerest of thanks for your support. **So many people inspire us in so many ways through their generous support of our movement. THANK YOU!!**

Bill Shiff

Community Map 2017

A NEIGHBORHOOD IN PROGRESS COMMUNITY-BASED DEVELOPMENT PLAN

We recognize the assets in our community and work with our neighbors to build:

AFFORDABLE HOUSING

"No Place Like Home!"
p.9 Recognizing the assets that already exist in our neighborhood means we see promise in property and blighted homes. Whether new construction (left) or restoration (right), we are building quality, affordable homes for our neighbors and their families.

ECONOMIC DEVELOPMENT

Build it and they will come!
p.8 Our hopes are simple: stimulate our community's economy in responsible ways that benefit those that live here. We do so by restoring assets, partnering with neighbors, investors, and other folks looking to do the same.

LEADERS

A Leadership Pipeline!
p.10 Students, parents, neighbors, and stakeholders come together to create a leadership pipeline that nurtures the skills, talents, and capacities in our community. Through the Youth Leadership Academy, Youth Entrepreneurship Center, Financial Literacy class, and partnerships with like-minded folks, we watch as those that are offered opportunity rise to the occasion.

Mission

Metanoia Community Development Corporation is a movement of people, rooted in faith. We invest in neighborhood assets to build leaders, establish quality housing, and generate economic development. We are pushing forward into new relationships with God and one another to create strong communities.

& Vision

Metanoia envisions a diverse community of people that are inspired and empowered to make the community better for generations to come; where quality housing and livable wage jobs are accessible to all; where there are academically achieving schools; where businesses

and faith communities benefit the community; where the quality of life includes green space and recreational opportunities; and where Reynolds Avenue is a hub of economic and social activities. We recognize the people of our community are essential to the accomplishment of this vision.

community...where it begins & ends.

ASSET BASED

Our innovative approach to community development focuses on identifying and investing in neighborhood assets - both human and physical- instead of just trying to fix problems. Every community has strengths and capabilities. We attract investment to these strengths and create opportunities for neighborhoods to be strengthened from the inside out.

COMMUNITY DRIVEN

Metanoia is led by community residents who invest their own time and energy in creating the community they want to see. The people that live in our neighborhoods are real experts on what works for their communities. No initiative is undertaken at Metanoia without community input and support.

ROOTED IN FAITH

We are a movement that seeks to become "good ground" for people to mature and grow their faith in God and one another. We believe that we are working alongside God who desires the health and renewal of our communities.

completed emergency repairs on **46 homes** for a total of **\$206,015.22**

ven as we celebrate the strides we make, we have a real grasp of the work left to be done. We continue to work collaboratively with neighbors, parents, and community partners to develop sustainable programs

that create opportunity. We are **pushing forward**.

The Macon Coffeehouse and Cafe

Through a partnership with Duvall Catering & Events, **The Macon Coffeehouse and Cafe** launched in January 2017. It was a place where folks could gather and grab an affordable bite to eat, with friendly faces serving them behind the counter. Duvall informed us that they would be closing all cafes to focus on their thriving catering and events business. We quietly sought the right fit for our community and are so thankful to Duvall for paving the way on Reynolds Avenue for **Dellz on the Macon!** "The Macon" closed their doors in mid-October and the much-anticipated opening of **Dellz on the Macon** took place in December 2017!

Paving the way on Reynolds Ave!

Urban Electric Company

Last year was the launch of a three year project with Urban Electric Company (UECo.), whose manufacturing plant is adjacent to our community. UECo constructs handcrafted lighting that is used around the world. Metanoia partnered with UECo to receive a federal Community Economic Grant that allowed the expansion of their operations, and in the process create **40 new jobs for low income individuals**. Our goal is to have as many of these new jobs as possible offered to the residents of the communities that we serve. After only one year, **24** of the 40 jobs have been filled!

The very best form of social uplift is a good job. Jobs at UECo offer opportunities for promotion, benefits, and can be obtained with a high school diploma. UECo employs one of our board members and neighbors, Rashawna Hawkins.

Scan for more about UECo jobs.

Metanoia is a 4-star, top-rated charity with Charity Navigator.

Clemson Coding Program

The **Clemson University Restoration Institute** partnered with Metanoia's Children's Defense Fund Freedom School to reach students in Chicora, Cherokee, Union Heights, and Accabee communities, to stimulate student interest and develop capacity in coding. The **Boeing Company** provided a generous grant direct to the **Clemson University Restoration Institute** to host the "Chicora Coding with Kids Program".

Forty students from the third to the fifth grades participated in the program Monday through Thursday afternoons for six weeks this summer. The modules used a visual component called "SNAP" as an intermediary tool to understand simple coding algorithms, then progressed students on to learning the C-S language for more complex coding. Metanoia CDF Freedom School students will participate in the coding program again in the summer of 2018!

"Chicora Coding with Kids Program"

Listening to Our Community

Each year we host a **neighborhood Town Hall** to gather our neighbors' input about our community. **It is a listening opportunity for Metanoia.** Board members, staff and students host stations where residents have the chance to discuss the assets and liabilities that exist in our neighborhood together. This is one of the forums that provide guideposts for programs and direction throughout the year. **We continue to believe that our neighbors are the true experts about our community.** ►

Metanoia's Town Hall 2017

ECONOMIC DEVELOPMENT WITH JUSTICE

Our hope is to create opportunities for small new businesses that can serve as the spark leading to re-development that benefits the people who live nearby, rather than boost prices and push our neighbors out. We are looking to create economic stimulus that is beneficial to everyone on our community.

Through opportunities to earn income, we are able to diversify our funding sources and use the funds to reinvest in our neighborhood. We use the money to build more homes, refurbish blighted buildings, attract business, and develop leaders in our community. This keeps the funds circulating through our community and benefits our neighbors.

A job partnership with Urban Electric Company has resulted in the creation of 24 quality jobs within walking distance of our neighborhood. Revitalization efforts on the main corridor running through our community include the opening of a cafe, creation of a Youth Entrepreneurship Center (planned expansion in 2018), and a partnership with Lowcountry Local First to provide incubator opportunities for businesses in an adjacent building due for completion in 2018. The earned income Metanoia receives is reinvested in our community and creates new opportunities.

THE ADAPTIVE RE-USE OF OLD CHICORA

Old Chicora Elementary School. We've had our eyes on it for a while... we've talked with our neighbors about the ways we could make good use of this asset, we've had architectural guidance as we imagined the possibilities, and we have considered the feasibility of those uses. Now, thanks to a 10-1 vote at North Charleston City Council, we have some time to see if we can make all of those plans and dreams a reality!

So what comes next? We dig in deeper to vet the viability of the uses we have identified, in-

cluding an early learning center, artist studio space, non-profit offices, and a performing arts center. We line up the commitments from partners anxious to invest in a project that will create real opportunities in our community, strengthen the economic stability of the area, and embody the feedback of the folks that live here. We also grow in relationship with each other as we develop partnerships of people that see each other's assets and are willing to risk a little to gain a lot.

Reynolds Avenue; Chicora-Cherokee's economic corridor.

Dell Grayson & Bill Stanfield sign the lease for Dellz on the Macon!

Establishing Quality Housing

Metanoia currently owns **30** lots for future development. **11** homes are fully financed and under or near construction phase!

Just one of the designs for new construction on 5 lots to begin in 2018.

TACKLING THE AFFORDABLE HOUSING SHORTAGE

A market needs assessment, conducted by **John Wall and Associates**, shows that North Charleston has a **deficit of 810 affordable homes**. As near-by communities can attest, when new construction and gentrification intersect, communities suffer. Without intercession, our neighborhood runs the risk of becoming another area where teachers, police officers and current citizens are priced out of the market.

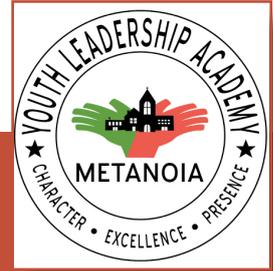

In an effort to thwart that displacement, Metanoia has slowly but

steadily acquired properties to work towards offering more quality homes that families can afford. We currently have **thirty properties** in our inventory. **Eleven homes are fully financed**. Three will have families occupying them in December 2017. The remaining nine are under or near construction phase. We are also partnering with some of our neighbors **to create a Community Land Trust in an effort to keep housing affordable**. This is a mere drop in the bucket compared to need, but **we continue to push forward one home, one family at a time!**

Building Leaders

youth leadership academy

YOUTH ACADEMY

A pipeline of curriculum-based learning opportunities are available to students demonstrating leadership potential from grades 1 to 12. One of the key components of the Academy is **parent engagement**. We have established an alternative currency where parents earn credits each month through engagement opportunities with Metanoia, the community and their child's school. These credits are a requirement for participation. On average, Metanoia families exceed the required credits, which is a key to success for our scholars.

FREEDOM SCHOOL

Freedom School 2017 was amazing! We began each morning with a guest reader from our extended Metanoia community. Students are inspired by the many career paths that readers represent and the stories they share. Students also participated in a computer coding camp, karate, art, and music! All of this was woven into an **integrated reading curriculum that increased or maintained the literacy of those participating by 98%!**

Scan QR code for more information about CDF Freedom School 2017!

YOUTH ENTREPRENEURSHIP CENTER

Hodari Screenprinting and Isoke Fine Jewelry have been making steady improvements as they learn more about the business cycle, marketing, and service. Both businesses have new websites this year, hodariscreenprinting.com/, isokefinejewelry.com, that the students built to expand their reach. Isoke Fine Jewelry is also planning to begin hosting jewelry parties in the coming year, so be on the look-out for announcements!

Chad Waldorf

"I support Metanoia because their community-led leadership style produces sustainable meaningful benefits for some of the most under-resourced residents of our state."

Mr. Waldorf is a local entrepreneur, investor, and advisor. He also served as the Deputy Chief of Staff to Governor Sanford and Vice Chairman of Governor Haley's transition team. In addition, he has served as the chair of several organizations including the SC Club for Growth and the SC Government Efficiency and Accountability Review Commission. His vast experience has afforded him a discerning eye when it comes to organizations that he supports.

We are deeply appreciative of Mr. Waldorf's generosity to our community and the invaluable counsel he has offered to us. Thank you Mr. Waldorf.

We recognize individuals who made gifts between July 1, 2016 - June 30, 2017 with deep appreciation. We are profoundly grateful for your support!

Ms. Sherron Jackson

"Metanoia is an outstanding community-oriented project. I have enjoyed following your progress through the years and I think we all should do everything we can to support Metanoia's remarkable work."

Dr. Sherron Jackson is a pediatric hematologist-oncologist, and is affiliated with MUSC Health-University Medical Center. Dr. J as many of her young patients call her, has been in practice for more than 20 years and is well-respected as a leader in the community. As a member of St. Matthews Baptist Church where Metanoia's offices are housed, Dr. Jackson has had a front row seat to witness our work over the years. This makes us especially appreciative of her support. Thank you Dr. Jackson!

The Exchange Club of Charleston

The Exchange Club of Charleston has the largest membership and raises the most money through fundraising of all the Exchange Clubs in the US.

Metanoia has been on the receiving end of The Exchange Club of Charleston's generosity for ten years. With their assistance, we have been able to buy a 15-passenger van to help us with student transportation, as well as furnish our new Volunteer Center and the café on Reynolds Avenue. The club has also recognized several of our youth leaders through their Youth Citizenship Awards. This year, the club invited Metanoia to set up a display at the Coastal Carolina Fair to help us *tell our story* to fair attendees. We appreciate the investment they make in the citizens of our neighborhood!
